

Portable Convection Space Heater

This convection space heater is designed for energy-efficient and consistent heating in small to medium-sized rooms. It is equipped with adjustable thermostat and power settings for customized comfort, along with an overheat protection system.

Product Overview

Efficient Heating Solution

This portable convection space heater is designed to provide consistent, energy-efficient warmth for small to medium-sized rooms. Utilizing advanced mica heating technology, it ensures rapid and even heat distribution to maintain your comfort. Safety is prioritized with integrated overheat protection and a tip-over switch, making it a reliable choice for any environment.
