

Portable DC Arc Welder with Adjustable Current

This portable DC arc welder is designed for a variety of welding applications. It features adjustable welding current and a durable construction suitable for industrial use.

Product Overview

Industrial-Grade Portability

The M448 Portable DC Arc Welder is engineered for professionals seeking a combination of industrial power and mobility. Its robust chassis, equipped with integrated wheels, allows for effortless transportation across work sites while maintaining a stable, reliable arc for precision welding. Designed for versatility, this unit supports a wide range of materials and thicknesses, making it an essential tool for varied fabrication and maintenance applications.

Technical Specifications

Key Performance Metrics

1 High

Arc Stability

Welder Type	DC Arc Welder
Model Identification	M448

Design and Build

Control System

- Adjustable welding current
- User-friendly control panel
- Standard cable connection ports

Construction Features	Portable, Wheeled Base, Robust Frame, Industrial Grade
