

# Portable Desiccant Dehumidifier

This portable desiccant dehumidifier is designed for both household and commercial environments. It removes moisture from the air, which helps prevent mold growth and corrosion.

## Overview

### Portable Desiccant Dehumidifier

This portable desiccant dehumidifier is designed for high-efficiency moisture control in both residential and commercial environments. Engineered to be robust and shock-proof, it remains reliable even in challenging conditions. Its advanced desiccant technology ensures effective performance in low temperatures, making it a versatile solution for humidity management.

## Performance

Minimum Operating Temperature	-20 °C
-------------------------------	--------

## Key Features

Design Features	Lightweight, Portable, Shock-proof, Wall-mountable
Maintenance	Easy to service

## Applications

### Ideal For

- Private households
- Storage facilities
- Archives
- Water damage restoration
