

Portable Diesel Water Pump for Irrigation and Construction

This portable diesel water pump is designed for efficient water transfer in various applications. It features a robust diesel engine for reliable power and a high-capacity pump for rapid water displacement.

Product Overview

High-Performance Portable Diesel Water Pump

This portable diesel water pump is engineered for efficient water transfer across demanding environments like construction sites, agricultural fields, and emergency response scenarios. Equipped with a robust, reliable diesel engine and a high-capacity pump, it ensures rapid water displacement when you need it most. The unit features a durable, protective frame for easy transport and is constructed with corrosion-resistant materials to ensure long-term dependability.

Technical Specifications

Pump Features

- Self-priming pump design
- Durable impeller construction
- Corrosion-resistant materials
- Easy-start diesel engine

Suitable Applications

Irrigation, Construction, Water Transfer, Emergency Response

Design & Build

Build Quality

Portable Frame • Corrosion Resistant • Heavy Duty
