

# Portable Electric Forced Air Heater

This portable electric forced air heater features a stable steel frame and adjustable air outlet angle. It is equipped with motor thermal protection and a stainless steel heating element.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Heating Solution

This portable electric forced air heater is engineered for high-performance heating in demanding environments such as workshops, garages, and construction sites. Featuring a durable heavy-gauge steel body, it provides reliable, fan-forced heat distribution across large areas. Designed with safety and versatility in mind, this unit is an ideal choice for professional spaces requiring consistent and efficient temperature control.

## Technical Specifications

### Power Output

**3000 W**  
Rated Power

**15 kW**  
Capacity

Voltage

208/240V

Body Material

Heavy-gauge steel

## Compliance & Safety

### Safety Features

- Overheat protection
- Sturdy base for stability
- ETL-compliant design

Global Standards

UL, ETL, SAA, CE, NOM

## Design & Usability

### Mobility

- Portable design
- Adjustable stand for airflow direction
- Wheeled cart for maneuverability
