

Portable Electric Generator with AC and DC Output

This portable generator provides dependable power for various applications. It features a durable frame with integrated wheels, multiple AC and DC output terminals, and a control panel with a frequency meter, voltmeter, and circuit breaker.

Product Overview

Professional Grade Power Solution

The WM12000CE is a robust and highly efficient portable generator engineered for professional power requirements. Featuring a forced air-cooled, 4-stroke engine, this unit delivers consistent performance with a maximum output of 12kW. Its user-friendly design includes both recoil and electric starting systems, ensuring reliable operation for diverse field and emergency applications.

Technical Specifications

Generator Details

Feature	Specification
Frequency	50/60 Hz
Type	Brushless, Self-excitation, 2-pole, Single-phase
DC Output	12V/8.3A
Engine Model	WM290F
Engine Type	Forced air-cooled, 4-stroke
Starting System	Recoil/Electric Starter

AC Voltage Options: 110V, 120V, 220V, 230V, 240V

Logistics and Compliance

Compliance

CE • RoHS

Shipping Information

- Net Weight: 70kg
- Gross Weight: 74kg
- Dimensions: 1030 x 840 x 735 mm
- Container Capacity: 48 units per 20ft container
