

Portable Electric Tire Inflator with Nozzle Attachments

This portable electric air compressor is designed for inflating tires and other inflatable items. It features a pressure gauge for monitoring inflation levels and is powered by a 12V DC power supply, making it suitable for use in vehicles.

Product Overview

Portable Electric Tire Inflator

This portable electric air compressor is a versatile solution designed for inflating vehicle tires and various inflatable items. Powered by a 12V DC source, it is ideal for roadside emergencies and routine maintenance for cars, trucks, vans, and 4x4s. The unit includes multiple nozzle attachments to accommodate different valve types, ensuring broad compatibility.

Performance Metrics

Maximum Pressure

250 PSI
Max Pressure

17 MPa
Max Pressure

Air Flow Rate

3.8 L/Min

Technical Specifications

Power Supply	12V DC
Rated Amperage	14 A
Cylinder Diameter	30 mm

Compatibility

Compatible Vehicles	Cars, Trucks, Vans, 4x4s, Bikes
