

Portable Electric Vehicle Fan

This portable electric fan is designed for personal cooling. It features a multi-blade fan encased in a protective plastic grill and is powered via a DC power cord with a cigarette lighter adapter, making it suitable for use in vehicles.

Product Overview

Compact Cooling Solution

The QWS11-2A is a portable electric fan specifically engineered for personal cooling in confined spaces. Its multi-blade design is encased in a protective safety grill, ensuring secure operation while delivering effective airflow. Powered by a standard DC vehicle outlet, this unit offers a versatile and energy-efficient solution for supplemental ventilation in cars, trucks, and recreational vehicles.

Technical Specifications

Safety Features

- Protective plastic grill casing
- Durable construction
- Low power consumption motor
