

Portable Electric Welding Machine

This portable electric welding machine is designed for various welding applications. It features a compact design with a handle and a control panel.

Product Overview

Compact Welding Solution

This portable electric welding machine is designed for versatility and ease of use in various welding environments. Its compact, lightweight chassis features an integrated handle, making it highly suitable for mobile applications and field work. The intuitive control panel allows for precise adjustments, while the built-in side ventilation system ensures efficient cooling during operation.
