

Portable Electric Wood Planer

This portable electric planer is designed for woodworking applications. It features adjustable depth settings for precise planing and a high-speed motor for efficient material removal.

Product Overview

Professional Woodworking Performance

This portable electric planer is engineered for versatile woodworking applications, offering high-speed motor performance for efficient material removal. Designed with adjustable depth settings for precise planing, it ensures consistent results across various tasks. Its ergonomic grip provides enhanced control and comfort, making it an ideal tool for smoothing rough surfaces, sizing timber, and crafting decorative edges.

Key Features

Core Capabilities

- High-speed motor for efficient material removal
- Adjustable depth settings for precision
- Ergonomic grip for comfortable handling
- Versatile application for smoothing and sizing

Design Highlights

Portable • High-Efficiency • Ergonomic

Best For

Smoothing rough surfaces, Wood sizing, Decorative edging, General woodworking
