

# Portable Electrical Generator

This is a portable electrical generator. It is equipped with multiple power outlets and a sturdy frame for stable operation.

## Product Overview

### Industrial-Grade Power Solution

This portable electrical generator is engineered for reliable performance in demanding environments, including industrial sites and remote locations. Featuring a robust frame and stable base, it is built to withstand heavy-duty use while providing consistent power. The unit includes multiple outlets to support various devices, making it an essential tool for backup power or field operations.

## Technical Specifications

### Ingress Protection Rating

IP 44

### Rated Voltage

230 V

### Rated Current

16 A

### Compliance Standards

MEPU-DE Norm

### Fuse Rating

100 mA

## Design & Build

### Key Design Features

- Sturdy protective frame
- Reinforced base for stability
- Portable trolley-style design
- Multiple power output configuration
