Product Overview

Professional Emergency Jump Starter

This portable emergency jump starter is designed to provide reliable, safe vehicle starting power for cars, SUVs, and trucks. Utilizing advanced super capacitor technology, it offers a safer alternative to traditional lithium-ion starters. The unit features an integrated digital display for real-time monitoring of battery voltage and charging status, alongside multi-functional USB ports for charging mobile devices and a built-in LED flashlight for roadside emergencies.

Technical Specifications

Key Features

- Digital LCD display for battery and status monitoring
- Integrated LED flashlight (Steady, Strobe, SOS modes)
- USB power bank functionality
- Boost mode for deeply discharged batteries
- Heavy-duty secure clamps

Safety Protections

Reverse Polarity Protection, Short Circuit Protection, Over-current Protection, Over-discharge Protection, Over-temperature Protection, Spark-proof Technology

Compatibility

Supported Vehicles

Cars • SUVs • Trucks • Motorcycles • Boats
