

Portable Evaporative Air Conditioner with Casters

This air conditioning unit is designed for household use, providing cooling and ventilation. It features a compact design with integrated controls and a water reservoir for evaporative cooling.

Overview

Portable Cooling Solution

This portable evaporative air conditioner is designed for efficient, mobile climate control. Featuring a centrifugal design with side air output, it combines cooling performance with advanced air purification technologies like photocatalyst vortex winnowing and anion dust removal. Its compact, fashionable build and integrated brake casters ensure it can be easily moved and positioned to suit any environment.

Key Features

Air Purification

Photocatalyst Vortex • Antibacterial • Anion Dust Removal

Cooling System

Evaporative Cooling, Imported Wet Curtain, Centrifugal Design, Side Air Mode

Usability & Design

Convenience Features

- Timer Switch
- Energy Saving Mode
- Removable Curtain Structure
- Easy-to-clean design
- Brake Casters

Control Interface

Backlit LED Display

Mobility

Yes
