

Portable Evaporative Air Cooler

This portable air cooler provides cooling and ventilation for indoor use. It features multi-speed settings, remote control operation, and a visible water level indicator.

Product Overview

High-Efficiency Portable Cooling

This portable evaporative air cooler is designed for effective indoor climate control, offering a versatile solution for cooling and ventilation. It features intuitive multi-speed settings and convenient remote control operation, allowing users to easily adjust airflow to their comfort. With a clear, visible water level indicator and a louvered front for precise airflow direction, this unit combines energy efficiency with user-friendly functionality.

Technical Specifications

Cooling Method	Evaporative
Operation	Remote Control, Manual Control Panel
Airflow Control	Adjustable louvered front

Design & Usability
