

Portable Evaporative Air Cooler with 30L Ice Storage

This portable evaporative air cooler is designed for personal or small room use. It features a dual fan design for increased airflow and a refillable water tank for evaporative cooling.

Overview

Professional Evaporative Cooling

The ZLF-2806RC is a high-efficiency portable evaporative air cooler engineered for effective climate control in small to medium-sized spaces. With a 30L tank capacity and dedicated ice storage, it provides sustained cooling performance in dry environments. The unit features intuitive controls, including a 7.5-hour timer and versatile wind modes, making it an ideal choice for localized comfort.
