

Portable Evaporative Air Cooler with Remote Control

This portable evaporative air cooler is designed for personal climate control. It features a multi-speed fan, adjustable louvers, a water tank with a visible level indicator, and a remote control, and it is equipped with caster wheels for easy mobility.

Product Overview

Efficient Personal Climate Control

The BS-188AE is a portable evaporative air cooler designed for energy-efficient cooling in homes, offices, and small commercial spaces. Utilizing advanced water evaporation technology, it provides a refreshing breeze while maintaining lower power consumption compared to traditional AC units. With integrated caster wheels and a remote control, it offers maximum mobility and convenience for professional and personal environments.

Key Features

Cooling Method

Evaporative Cooling • Energy Efficient • Personal Climate Control

Mobility & Design

Caster Wheels, Portable Design, Adjustable Louvers

Operation & Control

Control System

- Electronic control panel
- Digital status display
- Wireless remote control
- Multi-speed fan adjustment

Remote Control

Yes

Water Management

Water Level Monitoring

- Visible level indicator
- MAX fill line
- MIN fill line

Technical Specifications

Airflow Control

Adjustable louvers for directional airflow

Safety Features

Ventilation Safety (Don't Cover)
