

Portable Evaporative Air Cooler with Remote Control

This portable evaporative air cooler delivers efficient and cost-effective cooling for indoor environments. It utilizes evaporative cooling technology, drawing warm air through a moistened filter to provide cool, refreshing air.

Product Overview

Efficient Portable Cooling Solution

The Portable Evaporative Air Cooler provides a cost-effective and energy-efficient way to cool indoor spaces such as homes and offices. By drawing warm air through a moistened filter, it delivers refreshing, cooled air without the high energy costs of traditional AC units. Its mobile design with integrated casters and remote control functionality ensures maximum convenience and ease of use in any small to medium-sized area.

Key Features

Core Functionalities

- Evaporative cooling technology
- Multi-speed fan control
- Adjustable louvers for directional airflow
- Water tank with level indicator
- Remote control operation
- Caster wheels for easy mobility

Technical Specifications

Cooling Technology

Evaporative • Moistened Filter

Model Number	AC-2800A-PLUS
--------------	---------------

Operation & Safety
