

Portable Fabric Steamer for Garment Care

This portable fabric steamer is designed for efficient wrinkle removal. It features a compact design with an integrated handle and a flexible hose for targeted steam application.

Overview

Efficient Garment Care Solution

This portable fabric steamer is designed for professional-grade wrinkle removal and garment maintenance. With a powerful 1500W heating system, it reaches operational temperature in just 45 seconds, ensuring quick and efficient use. The compact design and integrated handle make it highly portable, while the 1L water tank provides up to 50 minutes of continuous steaming, making it an ideal choice for both home and travel garment care.

Performance Metrics

Power Output

1500 W Power	45 s Heating Time
------------------------	-----------------------------

Steam Flow Rate	30g-60g/min
-----------------	-------------

Technical Specifications

Capacity & Runtime

Feature	Value
Water Tank Capacity	1L
Continuous Steam Time	50 min

Electrical Requirements	AC230V, AC120V, 50/60Hz
-------------------------	-------------------------

Design & Convenience

Reach and Dimensions

- Steam tube length: 1.6M
- Power wire length: 1.8M

Key Features

Portable Design • Integrated Handle • Water Outlet Available
