Product Overview

The portable laser marking machine features a foldable structure, quick installation, and energy-efficient operation.

Compact Portable Laser Marking Solution

This portable fiber laser marking machine is designed for high-precision marking on a wide variety of materials including metals, plastics, and more. Featuring a 20W fiber laser source, it combines industrial-grade performance with a lightweight, foldable design that makes it ideal for workshops with limited space. The system is engineered for quick, plug-and-play installation, ensuring immediate usability for businesses, designers, and creative agencies.

Technical Specifications

Laser Power	20 W
Laser Source Type	Fiber

Physical Characteristics

Net Weight	10 kg
Device Volume	0.057 m ³

Performance & Efficiency

Energy Consumption	120 W
Installation Time	30 seconds

Applications & Materials

Compatible Materials	Gold, Silver, Stainless Steel, Alumina, Aluminum, Steel, Iron, Plastics
----------------------	---

Service & Support

Warranty Period	2 years
Service Options	OEM, ODM
