

Portable Garden Water Pump

This garden pump is designed for efficient water transfer and irrigation. It features a robust construction with a green motor housing and a black pump body.

Product Overview

Reliable Garden Water Management

This portable garden water pump is designed for durability and stability in daily irrigation and water transfer tasks. Built with a corrosion-resistant copper motor and a sturdy plastic shell, it ensures consistent performance for various gardening needs. The compact design and integrated handle make it an ideal solution for efficient water management.

Technical Specifications
