

Portable Gas Generator

This is a compact and portable gas-powered generator. It is designed for providing electrical power in remote locations or during power outages.

Product Overview

Portable Power Solution

The 950 series gas generator is a robust and compact power unit engineered for reliable performance in remote locations or during unexpected power outages. It features an intuitive easy-start system and a durable chassis designed for frequent transport. With integrated safety protocols including overload protection and low oil shutdown, this unit provides peace of mind while powering essential appliances and tools.

Technical Specifications

Model Identifier	GG950
Safety Features	Overload Protection, Low Oil Shutdown, Ventilation Warning, CO Awareness

Operational Guidelines

Safety & Usage

- Operate only in well-ventilated areas
- Check fuel levels and leaks before starting
- Do not operate in damp or rainy conditions
- Allow engine to cool before refueling
- Consult owner's manual for full safety rules
