

Portable Gas Stove Radiant Heater Attachment

This attachment converts a standard portable gas stove into a radiant heater. It is made of durable materials and features a metal housing with ventilation slots for efficient heat radiation and even distribution.

Product Overview

Efficient Portable Heating Solution

This radiant heater attachment is designed to transform your standard portable gas stove into an efficient heating device. Engineered for versatility, it features a durable metal housing with strategic ventilation slots to ensure even heat distribution. It serves as a compact and reliable heating solution, ideal for outdoor camping trips or emergency preparedness scenarios.

Technical Specifications

Design Features

- Radiant heating element
- Ventilation slots for airflow
- Compact form factor
- Even heat distribution

Material Composition	Durable metal housing
Compatibility	Standard Portable Gas Stoves

Usage

Ideal Applications

Outdoor Camping • Emergency Situations • Portable Heating
