

Portable Gasoline Generator

This portable gasoline generator is designed for powering various devices in different settings. It is suitable for construction sites, outdoor events, and as an emergency power backup.

Product Overview

Professional Portable Generator

This portable gasoline generator is engineered for reliable performance in demanding environments, including construction sites and emergency backup scenarios. Powered by a high-efficiency single-cylinder engine, it delivers robust power output with stability ensured by an automatic voltage regulator. Its durable build and dual-start system provide versatile operation for professional users seeking dependable power on the go.

Performance Metrics

Power Performance

3.5 kW

Max Power Output

3 kW

Rated Power

270 mL

Engine Displacement

Technical Specifications

Engine Configuration

- 4-Stroke, Single Cylinder
- Forced Air Cooling
- OHV 25° Valve Configuration
- Automatic Voltage Regulator

Electrical Characteristics

Parameter	Value
Rated Frequency	50/60 Hz
Rated Voltage	220/110 V
Phase	Single Phase
Starting System	Recoil / Electric

Fuel and Capacity

Operational Capacities

- Fuel Tank Capacity: 25L
- Oil Capacity: 1.1L

Dimensions and Logistics

Weight and Dimensions 67kg Net Weight, 69kg Gross Weight, 690x520x575 mm, 128 sets per 20ft container
