

Portable Gasoline Generator

This compact gasoline generator is designed to provide backup power. It features a durable construction, easy start mechanism, and a reliable engine for consistent performance.

Product Overview

Reliable Portable Power

This compact and portable gasoline generator is engineered to provide dependable backup power for a variety of demanding environments. Built with durable construction and an easy-start mechanism, it ensures consistent performance when you need it most. It is an ideal solution for construction sites, camping trips, and emergency power outages, featuring a user-friendly interface and integrated safety systems.

Technical Specifications

Model Identifier	LGE950
Fuel Type	Gasoline

Key Features

Design Highlights

Compact • Portable • Durable Construction • Easy Start

Suitable Applications	Camping, Construction, Emergency Power
