

Portable Gasoline Generator

This portable generator is designed for electric power transmission and distribution. It features AC and DC output capabilities, a gasoline engine, and a durable frame for easy transport.

Overview

Versatile Portable Power Solution

This portable gasoline generator is engineered for reliable electric power transmission and distribution in demanding environments. Designed with both AC and DC output capabilities, it provides essential backup power or primary electricity in off-grid locations. Its durable frame ensures easy transport, making it a robust choice for field operations and emergency power needs.

Power Output

Maximum AC Output

3 kW

Max AC Output

Rated AC Output

2.8 kW

Rated AC Output

Electrical Specifications

AC Voltage	230V
Frequency	50 Hz
Rated Current	13 A
Power Factor	COS 1.0

DC Output

DC Voltage	12 V
DC Current	8.3 A

Engine Specifications

Engine Power	6.5 HP
