

Portable Gasoline Generator

This portable gasoline generator is designed to supply electrical power in locations without direct grid access or during blackouts. It features an OHV engine, multiple power outlets, and a compact design for convenient portability.

Overview

Reliable Portable Power

This portable gasoline generator is engineered to provide dependable electrical power in remote locations or during unexpected power outages. Featuring a robust OHV engine and a compact, portable design, it ensures easy transportation and setup for various site requirements. It is an ideal solution for powering essential electrical devices and tools with reliability and ease of use.

Performance

Primary Applications

- Remote location power supply
- Emergency backup during outages
- Powering construction tools
- General electrical device support

Model ID

HX-2000

Engine Type

OHV (Overhead Valve)

Key Features

Portable, Gasoline Powered, Multiple Outlets, Compact Design
