

Portable Gasoline Generator

This robust portable gasoline generator is designed for backup power in various applications. It features a durable frame for protection and portability, and includes essential controls and indicators for monitoring performance and ensuring safe operation.

Overview

Versatile Portable Power Solutions

This series of portable gasoline generators offers reliable power solutions ranging from compact 1KVA units to heavy-duty 5.5KVA models. Designed for durability and ease of use, these units feature robust air-cooled engines and recoil starting systems, making them ideal for construction sites, outdoor events, or emergency backup power. With consistent voltage and frequency outputs, they provide stable electricity for a variety of professional and recreational applications.

Performance Metrics

Key Performance Indicators

5.5 KVA

Max Power (Max Model)

25 L

Max Tank Capacity

58 dB

Min Noise Level

Technical Specifications

Model Comparison

Feature	GS-950	GS-2800	GS-5800
Max Power (KVA)	1	2.6	5.5
Engine Type	2-Stroke	4-Stroke	4-Stroke
Tank Capacity (L)	4.5	15	25
Noise Level (dB)	58	67	74
Net Weight (kg)	21	47	83

Power Standards

220V, 50Hz

Starting Mechanism

Recoil
