

Portable Gasoline Generator

This portable generator provides electric power in remote locations or during power outages. It is suitable for powering small appliances, tools, and electronic devices.

Overview

Portable Power Solution

The Generator Gs950 is a portable gasoline-powered unit designed for reliable electricity generation in remote locations or during emergency power outages. Built with a durable frame for enhanced protection and easy transport, it is an ideal solution for powering small appliances, essential tools, and electronic devices. This generator combines robust engine performance with practical design to ensure you have power whenever and wherever you need it most.

Technical Specifications

Model	Gs950
Engine Type	Gasoline
Suitable For	Small Appliances, Power Tools, Electronic Devices, Emergency Backup

Key Features

Design Highlights

- Portable frame design
- Durable construction for protection
- AC power output capability
