

Portable Gasoline Generator

This portable gasoline generator provides electrical power in remote locations or during power outages. It features a durable frame with wheels, a control panel with multiple outlets and gauges, and a reliable engine for consistent power output.

Overview

Professional Portable Power Solutions

These portable gasoline generators are engineered for high-performance power delivery in professional and remote environments. Equipped with advanced technology such as automatic voltage regulators, low oil alerts, and non-fuse breakers, they provide safe and reliable electricity. Designed for durability and ease of transport, these units feature low vibration, low noise operation, and high fuel efficiency, making them ideal for demanding applications.

Technical Specifications

Model Specifications

Model Series	Rated Output (kW)	Max Output (kW)	Net Weight (kg)
EP1500/1500es	1/1.2	1.2/1.5	30
EP2500/2500es	2.0/2.3	2.2/2.5	44
EP3000/3000es	2.5/2.8	2.8/3.0	48
EP6500/6500es	5.0/5.5	5.5/6.0	87
EP8000/8000es	6.5/7.2	7.0/8.0	88

Electrical Standards

- Rated Voltage: 120V, 220V, 230V, 120/240V
- Rated Frequency: 50/60Hz

Features

Key Features

AVR (Automatic Voltage Regulator), Low Oil Alert, Non-fuse Breaker, Portable Design, Low Consumption, Low Noise, Low Vibration

Compliance & Quality

Certifications

CE • EMC • Euro II • Noise Identification
