

Portable Gasoline Generator

This compact and lightweight portable generator provides reliable power in various applications. It features durable construction and a user-friendly interface for powering small appliances, tools, and electronic devices.

Overview

Compact Power Solution

This portable gasoline generator is designed for reliability and ease of use in diverse environments. Its compact and lightweight construction makes it an ideal power source for outdoor activities, small construction sites, and emergency backup situations. Equipped with essential safety features like overload protection and low oil shutdown, it ensures safe operation while maintaining engine longevity.

Technical Specifications

AC Output	230V / 50Hz
DC Output	12V / 5A
Model Identifier	LB950-N-2

Features

Suitable Applications

- Small appliances
- Power tools
- Electronic devices
- Outdoor activities
- Construction sites
- Emergency power

Safety Features

Overload Protection, Low Oil Shutdown
