

Portable Gasoline Generator Set

This portable generator set features a protective frame and a control panel with indicators. Powered by a gasoline engine, it provides electrical power in remote locations or during power outages.

Overview

Reliable Portable Power

This portable gasoline generator set is engineered to provide dependable electrical power in remote locations or during unexpected power outages. Featuring a robust protective frame for durability and an intuitive control panel, it is designed for ease of use and consistent performance. It serves as an essential solution for maintaining operations where grid electricity is unavailable.

Technical Specifications

Rated Voltage

230 V

Voltage

Model Identifier

1.3GF

Power Source

Gasoline
