

Portable Gasoline Generator with AC and DC Outputs

This portable gasoline generator is designed for providing electrical power. It features AC and DC outputs, a fuel tank, and a recoil start mechanism.

Overview

Reliable Portable Power Solution

This portable gasoline generator is engineered to deliver dependable electrical power in mobile environments. Equipped with both AC and DC output capabilities, it provides versatile energy options for various operational needs. Its compact design and integrated recoil start mechanism ensure ease of use and quick deployment wherever power is required.

Technical Specifications

Safety & Control

- AC Reset Switch
- DC Reset Switch

Starting System

Recoil Start

Model Identifier	DY1400L
Power Output Options	AC Output, DC Output, DC 12 Volt
