

Portable Gasoline Generator with Inverter

This is a gasoline generator designed for power generation. It features a durable construction with a yellow and black color scheme and is equipped with wheels for portability and an inverter for stable power output.

Overview

Portable Power Solution

This portable gasoline generator is engineered for reliable power generation in diverse environments. Featuring advanced inverter technology, it ensures stable and clean power output suitable for sensitive electronics. Its durable construction, combined with integrated wheels, provides excellent portability and ease of use for professional and recreational applications.

Technical Specifications

Power Technology

Inverter • Gasoline

Control Panel

- Start/Stop Switch
- Integrated Controls
- Oil Indicator

Model Identifier

RG3500

Design Features

Portable, Wheeled, Durable Construction
