

Portable Gasoline Outboard Motor for Small Boats

This portable gasoline outboard motor is designed for small boats and watercraft. The engine is air-cooled and provides reliable power for maneuvering in various water conditions.

Overview

Reliable Portable Power for Small Watercraft

The 7GS-4 is a versatile gasoline outboard motor specifically engineered for small boats and recreational watercraft. Featuring a belt-driven propeller system and an air-cooled engine, it offers a lightweight solution that is easy to transport and install. Its adjustable mounting bracket and tiller steering ensure reliable maneuvering for fishing and general boating across various water conditions.

Performance Metrics

Performance Highlights

4 kW Nominal Power	3600 r/min Rated Speed	12 km/h No-load Velocity
------------------------------	----------------------------------	------------------------------------

Best For Small Boats, Fishing, Recreational Boating, Watercraft

Technical Specifications

Engine Model	KM178F
Complete Ship Load	6 T
On-load Velocity	e10km/h

Propeller System

Propeller Details

Feature	Specification
Diameter	355 mm
Blade Count	2 Blades
Rotation	Dextrorotation
Drive Type	V-belt (A-type)

Physical Attributes

Key Features

- Air-cooled gasoline engine
- Tiller steering system
- Adjustable mounting bracket
- Portable belt-driven design

Net Propeller Weight

52 kg
