

Portable Gasoline Water Pump for Irrigation

This portable water pump is designed for drainage and irrigation. Its gasoline engine provides efficient water transfer, and durable construction ensures long-lasting performance.

Overview

Professional Performance in a Portable Package

The QGZ40-35N is a robust gasoline-powered water pump engineered for reliable water transfer in demanding environments. Designed for agricultural irrigation, site drainage, and fluid movement, this unit combines high-efficiency power with a compact form factor. Its durable construction ensures longevity under rigorous conditions, while the integrated carrying handle provides maximum mobility for field operations.

Certifications
