

Portable Gasoline Water Pump for Irrigation and Drainage

This is a portable water pump designed for various applications such as irrigation and drainage. It features a robust frame for protection and is powered by a gasoline engine for reliable performance.

Overview

Versatile Portable Water Pump

This portable gasoline-powered water pump is engineered for reliable performance in remote locations where electricity is unavailable. Designed for irrigation, drainage, and general water transfer, its self-priming capability ensures quick operation without the need for manual priming. Built with a robust frame for protection and easy transport, this unit is a dependable tool for both professional field work and domestic water management.

Technical Specifications

Engine Power

4 HP

Rated Power

Priming Mechanism

Self-priming

Power Source

Gasoline

Key Features

Primary Applications

- Agricultural Irrigation
- Drainage Systems
- General Water Transfer

Design Attributes

Portable, Robust Frame, Compact, Durable Construction
