Overview

Portable Gasoline Water Pump

This portable gasoline water pump is a reliable and powerful solution designed for efficient water transfer across various applications. Built with a robust 4-stroke engine, it offers dependable performance for irrigation, construction sites, and emergency water removal tasks. Its durable construction and compact design ensure longevity and ease of portability, making it an essential tool for professional water management needs.

Technical Specifications

Engine Power

2.5 HP
Power

Engine Type 4-stroke, OHV

Inlet/Outlet Diameter 50 mm

Performance

Performance Metrics

30 m³/h
Max Flow Rate

26 m
Max Head

8 m
Max Suction

Capacity & Weight

Fuel Tank Capacity 3.6 L

Oil Capacity 0.6 L

Net Weight 25.5 kg

Features

Ideal Applications

Irrigation, Construction, Emergency Water Removal

Maintenance

Engine Care

Before operating the machine, ensure the crankcase is filled with 4-stroke motor oil (SAE30). Failure to follow these instructions may result in severe engine damage and will void the warranty.
