

Portable Heavy-Duty Air Compressor for Vehicle Tires

This portable heavy-duty air compressor is designed for inflating tires and other inflatable items. It features a pressure gauge for accurate inflation and comes with a variety of nozzle adapters for versatile use.

Product Overview

Professional-Grade Inflation Solution

This portable heavy-duty air compressor is engineered for reliable tire inflation across a wide range of vehicles, including cars, trucks, SUVs, and 4x4s. Built for durability and performance, it features an integrated pressure gauge for precision inflation and a compact form factor that ensures easy storage and transport. Powered by a standard 12V DC source, this versatile unit includes multiple nozzle adapters, making it equally effective for sports equipment and inflatable toys.

Technical Specifications

Power Supply	12V DC
Ideal Applications	Cars, Trucks, SUVs, 4x4 Vehicles, Buses, Sports Equipment
