Product Overview

High-Efficiency Industrial Heating

This portable industrial gas heater is engineered for demanding environments, providing reliable and clean heating solutions for large spaces, construction sites, and agricultural facilities. Designed for maximum efficiency, these direct heaters ensure optimal thermal performance while maintaining strict safety standards. The units are built for versatility and durability, featuring robust construction and easy mobility to support temporary or supplemental heating needs.

Technical Specifications

Safety Systems

- Overheat protection
- Flame supervision

Efficiency

100% efficient direct heating

Compatible Fuels

Propane, Natural Gas

Design & Utility

Mobility

- Mounted on wheels
- Easy positioning
- Robust construction

Build Quality

Steel Housing • High-Output Burner
