

Portable Industrial Ventilation Fan

This portable industrial ventilation fan provides high wind volume with low power consumption. Its advanced spraying process ensures a clean, bright, and durable surface, while its design minimizes noise.

Overview

High-Performance Portable Ventilation

This portable industrial ventilation fan is engineered for efficient air circulation in demanding environments such as warehouses, basements, and construction sites. It features a robust metal construction with a protective safety grill, ensuring both durability and operator safety during operation. Designed with energy efficiency in mind, the unit offers high airflow volume and pressure while maintaining low power consumption and noise levels.

Key Features

Key Features

Portable Design, High Airflow, Low Noise Operation, Energy Efficient, Corrosion-Resistant Finish, Safety Grill

Technical Specifications

Performance Parameters

Model	Air Volume (m³/min)	Power (W)	Speed (r/min)
PV-20	25	150	2900
PV-30	62	550	2900
PV-40	128	1100	2900
PV-50	225	1500	2900

Voltage Compatibility

110V • 220V • 240V

Frequency

50/60 Hz

Applications

Suitable Environments

- Warehouses
- Basements
- Parking Garages
- Mining Operations
- Metallurgy Facilities
- Chemical Processing
- Food Processing Plants
