

# Portable Inverter Arc Welding Machine

This portable welding machine adopts IGBT inverter technology to improve reliability. It features overheating, over-voltage, and over-current protection.

## Product Overview

The SUPER ARC-200H features a user-friendly control panel and a robust design for professional durability.

## Professional Inverter Arc Welder

The SUPER ARC-200H is a compact, high-performance inverter welding machine designed for versatility and reliability. Utilizing advanced high-frequency IGBT technology, it delivers stable arc performance suitable for both professional and DIY welding projects. Its portable design, combined with integrated safety features like over-voltage and thermal overload protection, makes it an ideal solution for on-site welding tasks.

## Technical Specifications

Easy-to-use rotary knob allows for precise amperage control to suit different materials and thicknesses.

### Welding Current Range

**30 A**

Minimum Current

**200 A**

Maximum Current

<b>Input Voltage</b>	AC 220V
<b>Frequency</b>	50 Hz
<b>Duty Cycle</b>	40 %

## Key Features

Designed for maximum portability, this lightweight unit includes a carrying strap for on-site efficiency.

### Core Technology

IGBT Inverter • High Frequency • Portable Design

### Safety Protection

Overheating Protection, Over-voltage Protection, Over-current Protection
