Overview

Portable Inverter Power Solution

This portable inverter gasoline generator is engineered for efficiency, reliability, and ease of use in residential or commercial settings. Its compact, lightweight design combined with a durable protective frame makes it an ideal solution for users needing stable power on the go. Equipped with advanced features like an automatic carburetor and a 3-in-1 digital display, it ensures optimal performance and simple monitoring for all your power needs.

Technical Specifications

Fuel Tank Capacity	10 L
Fuel Consumption Rate	0.25 L/kw.h
AC Output	220V
DC Output	12V 5A

Features & Safety

Safety Features

- Waterproof plug
- Overload protection
- Grounding connection
- Durable protective frame
