Product Overview

Clean and Reliable Power

This portable inverter generator is engineered to provide stable and clean power, making it an excellent choice for sensitive electronics and essential home appliances. Built for versatility, it is capable of running demanding equipment such as furnace fans and RV air conditioners. Its compact design includes integrated wheels and a folding handle, ensuring effortless transport for camping, outdoor events, or emergency backup situations.

Technical Specifications

Engine Type	MZ175
Power Technology	Inverter system with PWM technology
Throttle System	Load-dependent variable engine speed

Features & Capabilities

Ideal Applications

- Sensitive electronics
- Camping and outdoor events
- Emergency home backup
- RV air conditioners (up to 13,500 BTU)
- Furnace fans

Key Features

Inverter Technology, Recoil Start, Overload Protection, Low Oil Shutdown, Portable Design

Design & Portability

Portability

Concave Wheels • Folding Handle • Compact Housing
