

# Portable Inverter Welder Generator

This portable inverter welder generator is designed for various welding applications. It features adjustable welding current from 50A to 250A, a voltmeter, and a circuit breaker for safety.

## ADDITIONAL IMAGES

## Overview

### Portable Inverter Welder Generator

This versatile inverter welder generator is engineered for both professional and DIY welding applications. Featuring a robust 4-stroke, air-cooled OHV engine, it provides reliable power output ranging from 1.0kW to 4.0kW. Designed for safety and durability, the unit includes advanced protection systems and is built on a portable frame for ease of transport.

## Performance & Technical

### Welding Current Range

<b>50 A</b> Min Current	<b>250 A</b> Max Current
----------------------------	-----------------------------

### Engine Specifications

- 4-stroke
- OHV (Overhead Valve)
- Single cylinder
- Air-cooled

Rated Power Range	4 kW
-------------------	------

## Safety & Protection

Safety Features	AVR (Automatic Voltage Regulation), Over-voltage protection, Overheated protection, Overload protection, Oil alert system
Circuit Breaker Rating	18 A

## Certifications & Warranty

### Certifications

CE • EURO V • EPA • ISO 9001:2015

### Warranty

2 years or 600 continuous working hours

## Configuration Options

### Configuration Options

- Wheels and handles
- Recoil start or electric start
- Single phase or three phase
