

Portable Jump Starter with Light

Portable power generator designed for jump-starting vehicles. It features a built-in light, battery level indicator, and heavy-duty clamps for emergency use.

Overview

Reliable Emergency Power Solution

This portable jump starter is an essential tool for vehicle emergency preparedness, combining a high-capacity 12V 18AH battery with versatile functionality. Designed for reliability, it features robust jump-start capabilities, a built-in air compressor for tire maintenance, and an emergency light for low-visibility situations. Its compact, portable design ensures you have a dependable power source wherever you go.
