Overview

Precision Laser Marking Solution

This portable laser marking machine is engineered for high-precision engraving and permanent marking on a wide variety of metal and plastic materials. Its compact, robust design allows for easy integration into diverse industrial workspaces, ranging from small workshops to larger production lines. Featuring advanced laser technology and a user-friendly interface, this system is ideal for demanding applications such as product identification, serial number engraving, and custom personalization.

Technical Specifications

System Features

- High-quality laser source
- Adjustable power and speed settings
- Stable work platform
- Integrated safety features
- Compact, portable design

Primary Applications

Industrial Marking • Product Identification • Serial Numbering • Decorative Engraving

Suitable Materials

Metals, Plastics
