

# Portable LED Emergency Lantern

This portable LED emergency lantern provides reliable illumination during power outages or where conventional lighting is unavailable. It features high-intensity LEDs arranged in a rectangular configuration to maximize light output and coverage area.

## Product Overview

### Reliable Emergency Illumination

This portable LED emergency lantern is designed to provide dependable lighting during power outages or in areas without conventional electricity. Featuring 90 high-intensity SMD3528 LEDs, it offers a luminous flux of 420 lumens for effective coverage. With a durable, portable design and a long-lasting sealed lead-acid battery, this lantern is an essential tool for emergency and security lighting applications.

## Technical Specifications

### Luminous Flux

**420 lm**

Luminous Flux

LED Quantity	90
LED Type	SMD3528

## Power & Battery

Input Voltage	220V 50-60Hz
Battery Type	Sealed Lead-Acid
Battery Configuration	3pcs 4V 1100mAh
Runtime	6-8 hours

## Features

Operational Modes	AC/DC, HI/LOW
-------------------	---------------

## Dimensions

Physical Dimensions	530 x 64 x 46 mm
