

Portable LED Work Light Kit with Tripod

This portable LED lighting kit features a high-intensity LED lamp mounted on a tripod stand, packaged with accessories in a durable carrying case. It is designed for professional use in photography, videography, and industrial applications where bright, directional lighting is required.

Product Overview

Professional Portable Lighting Solution

This portable LED work light kit is engineered for demanding professional environments, including industrial sites, photography studios, and videography setups. The system features a high-intensity LED lamp mounted on a sturdy, adjustable tripod stand, ensuring precise directional lighting wherever it is needed. Each kit comes complete with essential accessories, including spare tubes and power adapters, all housed in a durable aluminum carrying case for secure transport and storage.
