

Portable Magnetic Drill Press

This portable drill press is designed for on-site metalworking. It features a strong magnetic base for secure attachment to steel and adjustable speed settings.

Product Overview

Portable Magnetic Drill Press

This high-performance magnetic drill press is engineered for precision metalworking in industrial environments such as construction, shipbuilding, and bridge building. Featuring a robust 1850W motor and a powerful 18000N magnetic base, it ensures secure attachment and efficient drilling on steel surfaces. Its reversible rotation and versatile capacity make it an essential tool for demanding on-site drilling and tapping applications.

Technical Specifications

No Load Speed

- 260 rpm
- 460 rpm

Motor Power

1850 W

Voltage Options

230V / 50Hz, 120V / 60Hz

Performance Metrics

Key Performance Metrics

60 mm

Hole Cutting Capacity

18000 N

Magnetic Adhesion

210 mm

Stroke

Drilling & Tapping Capacity

Operation	Capacity
Hole Cutting	60mm dia. x 75mm deep
Twist Drilling	2.5 – 16mm dia.
Tapping	M18

Physical Characteristics

Additional Features

Reversible Rotation • Portable • Magnetic Base

Tool Holder

19.05mm (3/4")

Net Weight

21 kg
