

Portable Maize Thresher

This portable maize thresher is designed for efficient corn processing in agricultural settings. It features a robust construction with a hopper, threshing mechanism, and discharge chute, mounted on a wheeled chassis for easy transportation.

Product Overview

Efficient Field-Ready Processing

The Portable Maize Thresher is engineered for high-efficiency corn processing directly in agricultural environments. Its robust construction includes a dedicated feeding hopper, a secure threshing mechanism, and a streamlined discharge chute for clean grain collection. Designed for mobility, the unit features a wheeled chassis and handle, allowing operators to easily transport the machine across fields for on-site threshing.

Design & Mobility

Portability Features

- Wheeled chassis for easy movement
- Integrated handle for maneuverability
- Compact, self-contained design

Safety & Construction

Enclosed Threshing Mechanism, Protective Housing, Field-Ready Construction
